Got it, thanks for the explanation. We will have a few things to bring up tomorrow with regard to **Ex. 5 Deliberative Process (DP)** **Ex. 5 Deliberative Process (DP)** am also concerned about **Ex. 5 Deliberative Process (DP)** although I know that **Ex. 5 Deliberative Process (DP)** probably won't be the main focus of the discussion.

Elyssa

Yes. Unfortunately the action came in a while back and sat with management trying to decide whether to send it forward for review (unnecessarily expending resources), knowing that it was unlikely to move forward in a positive direction. It was last week that I was told to move it to the science teams. Which is why we are outside of that time frame.

However, if there are any deficiencies, even though we may have missed that time frame, I will talk with Marion and OGC to see what our options are for getting them addressed or kicking out the action.

Thanks.
Debra

Hi Debra, I just checked OPPIN for the technical screen date for this and it says it was July 15. Is that correct?

Thanks,
Elyssa

Subject: Aldicarb new uses - EFED BEAN

Hi,

Attached is the BEAN for the new use action for aldicarb on citrus (oranges / grapefruit only) grown in Florida and Texas. The proposed labels are attached. We should have labels with the limes and lemons removed, but I have not yet located them and will send them separately once I find them. (Sorry for the inconvenience.)

The tolerance for citrus is still active in the 40CFR, so they are not petitioning for a new tolerance, so no petition was submitted.

The registrant is submitting two new MRIDs (50695601 and 50780602) for:

1. Drinking water exposure assessment
2. Proposed lateral groundwater flow velocity

Please review the submitted MRIDs and provide DERs, as appropriate and an ecological risk assessment for the additional uses for Aldicarb. I will be setting up a team meeting in the next week to discuss any paths forward or stop the actions. Please let me know if you have any questions. Debra Rate RD/IVB2; 703-306-0309.

Attached are the proposed labels for the EPA Reg. No. 87895-2 (Technical) and 87895-4 (EP); cover letters; data matrices.
